DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4, 7-10, 20-22, 24-31, 34, and 35 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Publication 2002/0107589 to Grimm in view of U. S. Patent No. 5,842,212 to Ballurio et al. are references closest to the claimed invention. Grimm discloses a system for estimating a remaining equipment life based on a plurality of parameters comprising: a data storage component configured to store data relating to the plurality of parameters; a data integration component configured to integrate the stored data; and a life estimation component configured to estimate the remaining equipment life using the integrated data. Ballurio et al. disclose an unified index structure providing quick retrieval for even the most complex queries, minimum processing overhead for the database server, and the ability to segment the processing overhead on multiple processors in a multi-processor or client-server environment. However, Grimm in combination with Ballurio et al. do not teach determining a representation for at least one of the plurality of parameters in terms of a unified index indicative of the remaining equipment life and mapping the at least one of the plurality of parameters to the unified index, to generate at least one mapped parameter; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
